RE: Notice of RCRA Permit Class 2 Modification

Hazardous Waste Management Corrective Action Permit Number TNHW-136
INVISTA
Chattanooga, Tennessee
EPA ID Number: TNR 000018101

Dear Sir/Madam:

The INVISTA S.à r.l. (INVISTA) facility (fka DuPont Chattanooga Plant) located at 4501 North Access Road, Chattanooga, Tennessee is notifying you of a Request for a Class 2 Permit Modification to its Corrective Action Permit TNHW-136. As required by the Tennessee Department of Environmental and Conservation (TDEC) Hazardous Waste Management Regulations, INVISTA is mailing this notice to everyone who has requested that they be notified of hazardous waste-related activities at the Chattanooga facility and is on the facility mailing list maintained and provided by the TDEC.

The Permit identifies corrective action measures of a site-wide long-term monitoring program and institutional controls that have been implemented for the protection of human health and the environment for certain Solid Waste Management Units (SWMUs) and Areas of Concern (AOCs). The site-wide long-term monitoring program includes semiannual groundwater and surface water monitoring.

Based on review of the historical data from 2004 to present, INVISTA is requesting removal of certain parameters from the monitoring program that have been consistently non-detect and/or below their respective MCLs, as applicable, or that have had intermittent low level detections.

INVISTA is also requesting the removal of certain ground water monitoring wells from the network and the surface water monitoring locations which have not exhibited concentrations of any constituents above their respective maximum contaminant levels (MCLs), or which have exhibited very few historical results detected above their respective MCLs and currently exhibit non-detect concentrations. Additionally, the permit is being modified to change the frequency of the monitoring, water level measurements and reporting requirements from a semi-annual to an annual basis. INVISTA believes the revised long-term monitoring well network provides adequate upgradient and downgradient monitoring locations for the groundwater plumes in both the bedrock and residuum aquifers.

Pursuant to the Tennessee Rules for Hazardous Waste Management, Chapter 0400-12-01, a sixty-day public comment period will begin on the date of publication of this notice in a local newspaper of general circulation October 3rd, 2016. During the public

comment period questions or comments may be communicated to the contacts listed below.

INVISTA will host a public meeting on November 3rd, 2016 at 6:00pm on the 4th Floor of the Chattanooga Downtown Library located at 1001 Broad Street, Chattanooga, Tennessee. Representatives of INVISTA will be present to answer questions or discuss the proposed modification.

Notice of this proposed modification must be sent to all persons on the facility mailing list that is maintained by the Commissioner and to appropriate units of State and local government.

The permittee's compliance history during the life of the Permit being modified is available from the TDEC contact person, Mr. Clayton Bullington, at (615) 532-0859 and/or clayton.bullington@tn.gov.

During the sixty (60) day public comment period following publication of this Notice, beginning October 4th and ending December 3rd, a copy of the Class 2 Permit Modification will be available to review online at <http://go.usa.gov/xKtnc> and a hardcopy will be available at the following location:

Chattanooga Downtown Library
1001 Broad Street
Chattanooga, TN 37402
Monday - Thursday: 9am – 8pm
Friday and Saturday: 9am – 6pm
Sun: Closed
(423) 643-7700
